EDUCATIONAL EXPERIENCE

Server-Side Project, ETSU

Chattanooga, TN

Create a website using an API/database and a framework. December 2023

- Our website interacted with different APIs for a video game
- Used Python's Django, HTML, CSS, JavaScript, and Bootstrap
- Added search functions so the user can search for which player's information they want displayed
- Created 5 fully functional pages displaying different information (from player stats to the in-game shop, events, and news) in one week

Project Client Website, ETSU

Chattanooga, TN

Work with a client and create a website for them. March 2023 – May 2023

- Interacted with a real client to provide what they wanted
- Designed and programmed a fully-functioning website using HTML, CSS, and JavaScript with 5 different pages in 2-3 weeks
- Quickly learned a new programming language (JavaScript)
- Our client loved it, and my team presented the website to over 30 people

Database Design and Implementation, ETSU

Chattanooga, TN

The final project for Database Advanced Topics. June 2023 – August 2023

- Created a fully functioning program management system
- Designed an Entity Relationship Diagram (ERD) and worked with other teams to create one large diagram
- Interacted with our client professionally
- Transformed ERD into a database using structured query language (SQL)

INDUSTRY EXPERIENCE

Cashier, The Bread Basket, July 2022 – January 2023

Chattanooga, TN

- Operated as a team with other co-workers to complete tasks
- Multi-tasked and handled multiple customers at once
- Maintained and ensured an organized workspace
- Oversaw items and orders
